

Imex Systems Inc. Overview

Software, Services & Solutions

Imex Systems Inc.

Today's world of rapidly changing technologies and economics challenges businesses everywhere with increasing costs, skill shortages and the pressures of globalization. Imex Systems Inc. is geared to help address these challenges as we focus on leveraging Information Technology to derive maximum benefits for our customers.

Since our incorporation in 1997, Imex Systems Inc. has steadily grown and become a dynamic and highly reputable organization. Our advanced infrastructure, tools, methodologies and skilled staff help deliver projects on time and on budget.

Imex Systems Inc. is staffed by experienced professionals with a wide array of experience in Software, Systems, Quality Assurance and Project Management. We partner with technology leaders to combine their products with our business and project delivery expertise to provide leading edge business solutions.

Our confidence is based on our proven track record of success. Our reputation is built on quality, service and cost effectiveness. We consider our customers as partners and focus on achieving their business goals.

Imex Systems Inc. delivers a wide range of services and solutions, from business critical banking systems to life saving healthcare applications. We bring government services to the citizens providing 24 x 7 conveniences through multi-channel delivery.

We are currently serving customers in public and private sectors across Canada and the United States and are now expanding to Japan and Europe.

What We Do

Imex Systems Inc. offers an array of professional services to assist our clients in addressing their IT service needs in a flexible and cost effective manner. Our diverse delivery models and multi-platform capability enables us to provide the most suitable skills, services and solutions to meet our clients' specific needs.

With our focus on e-solutions, we have developed specialized products and solutions which help governments and businesses improve skills, integrate processes, deliver electronic services, achieve greater operational efficiency, enhance collaboration and reduce costs.

Our migration solutions help our clients transform older and unsupported legacy applications into user friendly applications running on current and supported platforms.

Our hosted solutions further help minimize infrastructure costs and maximize the reliability and security of data and applications.
