

Managed Hosting

Hosting Solutions

Imex Systems Inc. offers managed hosting services for applications and data.

Our hosting services support critical e-Business and e-Government applications, Portals, and other custom web applications and provide assistance in the case of disaster recovery.

Hosting is provided in a highly secure, banking-grade, state-of-the-art data centre with extensive built-in redundancy features to guarantee 99.99% uptime.

Our Data Centre includes:

- Power backup with dual power feeders, triple diesel generators and UPS
- A sophisticated HVAC system to ensure an optimal operating environment
- Fire protection using a gas fire suppression as well as sprinkler system
- A hardened perimeter and extensive physical security for both the building and the equipment
- Redundant internet connections from multiple backbone providers to ensure uninterrupted internet connectivity
- Automated back-up facility
- 24 x 7 monitoring of servers and applications

Imex Systems Inc. provides and manages the hardware, software, and firewall protection to ensure continuous operation and security.

Clients can request VPN connections to access their data and applications.

Our IT Services practice provides full application and data maintenance and management for client applications.

Imex Systems Inc. is a member of Microsoft's Hosting Solution Program. In addition to Windows hosting, we also provide UNIX, Solaris and Linux environments.
