

IT Services & Solutions

Services Designed to Do More, with Less

Businesses today are facing the challenge of providing better products and services while reducing costs in order to effectively compete in the global economy. Even governments are striving to cut taxes and increase services while defending themselves from new economic and security threats.

Imex Systems Inc. provides a wide range of professional services and specialized solutions that leverage information technology to maximize return on investments and increase revenue in any organization.

Our delivery model is flexible and can be tailored to individual needs. We can provide staff to augment your internal resources or take complete turn-key project delivery responsibility using onsite and/or offsite teams.

Our services encompass all major hardware and software platforms.

Our IT Professional Services include:

- IT and Business Process Consulting
- Application Design and Development
- Application and Data Maintenance
- Legacy Application and Data Migrations
- Web Enablement of Legacy Applications
- Re-engineering
- Enterprise Application Integration (EAI)
- Database Administration
- Mobile / Wireless connectivity
- Nearshore / Offshore Outsourcing

We provide a single source for technical skills, solutions and support.

Avoid critical IT skills shortages through access to our world class IT professionals.

Imex consultants help you complete projects quickly and efficiently, reduce overall IT costs and increase productivity.

Solutions

Oracle Migration - Imex Systems Inc. provides a comprehensive range of Oracle migration solutions including Forms Migration, Reports Migration, and Database Migration to current versions. Our proprietary tools provide automated migrations with significant cost and time savings.

.NET Migration - With extensive experience on Microsoft .NET technology, we help you to move your legacy Microsoft and non-Microsoft applications to the .NET platform.

Portal and Content Management Systems - Imex Systems Inc. markets, supports and provides implementation services for Portals and Content Management systems. We recommend and implement appropriate solutions that meet our client's specific needs, preferences and budget.

Enterprise Applications Integration (EAI) - Our business integration, process management and development solution provide enterprises with the agility to handle the unending stream of business challenges. Enterprises can deploy new business processes, create new composite applications and implement more flexible Service Oriented Architectures (SOA) that help reduce operational costs and improve internal operations.

e-Government Solutions - Our dynamic solutions enable electronic service delivery by Governments of all levels to improve operational efficiency, reduce costs and provide 24 x 7 conveniences to citizens, while enhancing communications with citizens and facilitating community collaboration.

e-Business Solutions - We provide comprehensive e-Business solutions to help companies effortlessly interact with customers, suppliers, employees and partners. Our solutions allow you to offer your customers self-service and online technical support, secure online payment processing, deliver bills, invoices and receive payments, and provide wireless connectivity for mobile staff.

e-Learning Solutions – Our iLearn solution helps organizations manage the learning process, design, develop and deliver courses online to keep their employees up to date with the required skills.

Web Accessibility - Imex Systems Inc. has extensive experience converting existing web sites into special needs accessible sites as per US Sec 508 and Ontario Disability Act, 2001 meeting W3C/WAI guidelines. Our Web Accessibility services include consulting on accessibility standards, evaluation of existing sites to determine barriers to access, redesign and development of websites and applications to comply with accessibility standards and the conversion of file standards for accessibility compliance. eg. PDF to HTML or Tagged PDF.

Engineering and Real Time Systems Solutions - Imex Systems Inc. is capable of providing special solutions tailored towards engineering and design companies to improve performance, reduce costs and meet regulatory compliance. Our real time solutions include custom made simulation, control, monitoring, user interface and safety systems.

Managed Application Hosting

In order to minimize your infrastructure costs, Imex Systems Inc. offers fully managed application hosting in a highly secure, banking-grade data centre with 99.99% guaranteed uptime. We provide all the hardware, software, firewall protection and management of the system and we are also able manage your data and applications if desired.
