

FOR IMMEDIATE  
RELEASE

## Imex Systems to Showcase New Generation of Tools for Modernization of Oracle Forms and Reports, Management and Reengineering of Oracle Forms Applications at Oracle OpenWorld

San Francisco CA - October 11, 2009 - The annual event is hosted by Oracle, and will be held in San Francisco October 11th through 15th at the Moscone Center.

Imex Systems develops and markets ORMIT® Suite of Oracle Forms and Reports tools. In addition to tools, Imex Systems also provides Oracle forms migration services, which makes OpenWorld an excellent venue to showcase:

**ORMITForms:** this renowned tool enables firms who are seeking to upgrade their Oracle Forms & Reports applications from any previous version (2.x, 3.0 4.5, 5, 6.x) to 10g or 11g. This tool handles the full migration project life cycle right from premigration application analysis to creating deployment ready application.

**ORMITJava/ADF:** provides a simple option for users to migrate their Forms based application to the Oracle Java/ADF environment, while following standards and pursuing best practices to create a robust Java application.

**ORMIT Forms Tools Suite:** a comprehensive set of tools that consist of ORMITAnalyzer, ORMIT-Manager, ORMITSOA. This tool suite enhances the developer productivity for Oracle Forms application management and reengineering. The functionality includes application analysis, impact analysis, source code control, version history, SOA implementation etc. The suite is modular, allowing customers to acquire only the functionality they require and not pay for unnecessary features.

Imex has been working closely with Oracle Modernization Groups worldwide to upgrade Oracle forms users to the web (10g/11g) and Java. "With the need by businesses to reduce their cost of ownership by moving to the web and with Oracle's strategic investment in Java, Imex systems Inc. is excited to be a provider of "best of class tools" in this rapidly growing marketplace." states Tony Semas, Director of Oracle Sales at Imex Systems.

"Attendees, like our customers, will appreciate that after thoroughly investigating all forms modernizations options available, ORMIT emerges as the superior solution in eliminating project risk, as well as time and cost overruns," adds Semas.

### About the Oracle PartnerNetwork

Oracle PartnerNetwork is a global business network of more than 20,000 companies who deliver innovative software solutions based on Oracle software. Through access to Oracle's premier products, education, technical services, marketing and sales support, the Oracle PartnerNetwork program provides partners with the resources they need to be successful in today's global economy. Oracle partners are able to offer their customers leadingedge solutions backed by Oracle's position as the world's largest enterprise software company. Partners who are able to demonstrate superior product knowledge, technical expertise and a commitment to doing business with Oracle qualify for the Certified Partner levels.
