

# iMember

## Association Member Management System

iMember is a web-based Association Management System that helps organizations manage member services, events, and event registrations.

iMember is designed to administer the membership functions of organizations such as Trade, Technology or Professional Associations, Chambers of Commerce, Sporting and Hobby Clubs, and Non-profits. This system manages both the parent body and its chapters and can be a standalone application or integrated into an existing web site or portal.

### iMember Services:

- Online Membership Registration with integrated Fee and Dues Collection
- Member Communications
- Member Information Management
- Secure Area for Restricted Member Information

### iMember Event Management Tools:

- Event Information Publishing & Broadcasting
- Online Event Registration, Fee Collection & Cancellation Management
- Table Management
- Past Event Reporting

iMember allows organizations to publish all information about the association including Executives, Chapters and Committees as well as offering collaborative services such as bulletin boards and online chats.

### Administrative Interface

No technical skills are required to manage the iMember system which is accessed through a secure administrative interface. Full content management services are provided to enable changes to the website to be made easily by any administrator. The system easily facilitates integration with existing accounting systems while providing maximum protection for member information through various standard security implementations, access controls, data encryptions and more...
